

# NATIONAL EUROBOT 2010 QUALIFICATION and INTERNATIONAL FORUM ON ROBOTICS

Events to support growing popularity of Eurobot in Russia

<http://www.eurobot-russia.ru/merop/2010/national>

14-17 April 2010, Moscow, Russia

## Invitation to participate

National Organizing Committee (NOC) of Eurobot competitions in Russia is calling for participants willing to take part in two of its main 2010 spring events: National Eurobot Qualification competition and International Forum on Robotics. Both events will be conducted simultaneously on 14-17 April 2010 in Moscow, Russia.

**National Eurobot Qualification** is a competition of teams presenting their mobile autonomous robots (older students) and human-controlled robots (younger schoolchildren) in a sporting spirit. Accepted projects should comply with Eurobot 2010 rules (<http://www.eurobot.org/eng/rules.php>) or Eurobot Junior 2010 rules (<http://www.planete-sciences.org/robot/index.php?section=pages&pageid=92>). A successor of previously introduced (by the Czech NOC) Starter league is also available to teams building human-controlled robots based on Eurobot 2010 rules with some special restrictions applied to official autonomous version of rules. See those on the site of the event: <http://www.eurobot-russia.ru/merop/2010/national>.

National Eurobot Qualification is open to all interested teams, national or international. Russian NOC is supporting teams from other countries with a sum of 250 Euros per team to cover travel expenses.

**International Forum on Robotics** is aiming at demonstrating to the general public and specialists the results of projects conducted by teams and individuals of different difficulty level. Also forum is considered a good place to form new professional connections for further communication.

Organizers of the Forum are considering publication of articles applied to the scientific-practical conference of the Forum by scientists and engineers of educational and industrial backgrounds. Eurobot teams are encouraged to apply to the conference with their robotic projects. Conference is aimed at the problems of robotics in general, robotic project management, robotic education.

Russian NOC is supporting international participants of the scientific-practical conference of the Forum – individual speakers with Eurobot background with a sum of 250 Euros to cover travel expenses.

**Deadline** to accept this invitation is 20<sup>th</sup> of February, 2010. After this date no applications will be considered.

**How to apply?** Send an e-mail application describing your wish to participate including your name and activity you want to take part. E-mail to address: [eurobot.russia@gmail.com](mailto:eurobot.russia@gmail.com). For articles we'll need author full name, name of the article, contact information, and short (not more than an A5 page) thesis describing the final article to be published. Article and thesis should be written in English or Russian. The deadline for article thesis submission is 1<sup>st</sup> February, 2010. Authors then will be notified within 2 weeks of the acceptance.

### **Organizers**

- Russian Eurobot NOC
- Moscow city department of education
- Moscow city department of science and industrial politics
